Your service for interactive video teaching

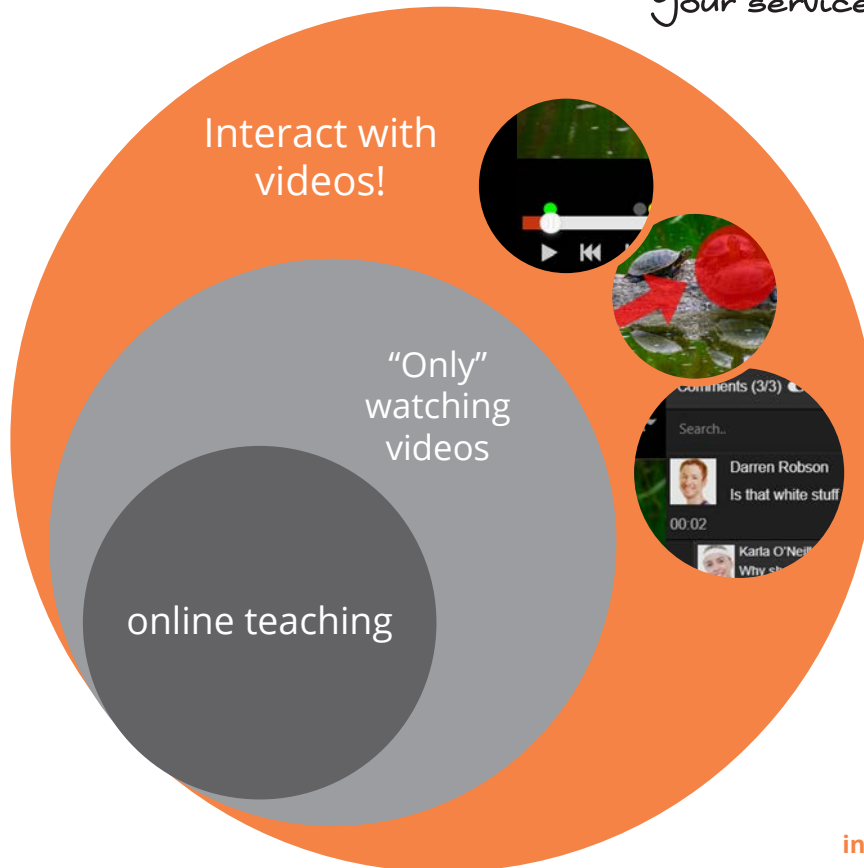

Interactive Video Suite

INTERACTIVE VIDEOS?

The Interactive Video Suite (IVS) is a simple add-on for existing Learning Management Systems (LMS). With this technical extension, you expand the didactic possibilities of video teaching significantly.

Students can post questions or comments directly into the video (at a time stamp). Add this to your lectures, seminars and other formats to make them didactically alive!

More than video based learning!
Your service for interactive video teaching

Application example lecture

1

Instructors record their lessons via video or screencast and make them available to students online.

2

Students can watch the lecture and ask questions via video annotation at the points where e.g. they have not understood something (red traffic light).

3

Instructors could address key questions from students and clarify problems in the following session.

Use cases

LECTURES

Use interactive videos to let students ask questions.

LABORATORY EXERCISES

Provide information about dangers with interactive videos.

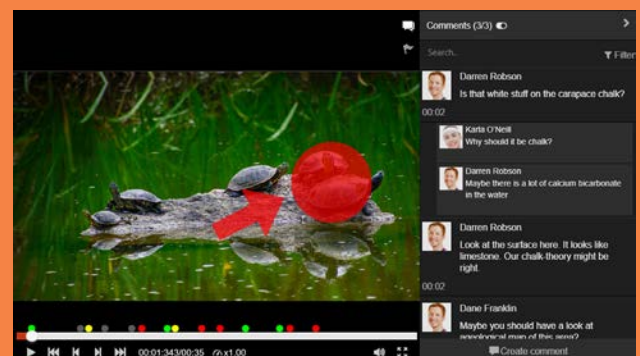

SEMINARS

Organize discussions & feedback with interactive videos.

EXCURSIONS/ FIELD TRIPS

Explore „the world“ with interactive videos.

Pricing

valid from 01.01.2020

The IVS is an online service provided via a moodle plug-in. It is a valuable extension of the didactic possibilities of videos. The plug-in can be installed free of charge via the moodle directory or can be downloaded from our website. In order for you to be able to use the functionalities of the IVS without any restrictions, you have to purchase temporary

rights of use when installing the plug-in. With IVS as a SaaS solution you automatically benefit from regular security updates and the further development of all functionalities. Furthermore, all data (videos, video comments etc.) are stored on your servers.

PRICING FOR THE ENTIRE MOODLE INSTANCE (UNLIMITED COURSES)

	max. users	Price per user	Total price per year
